

CTO & Co-Founder – SaaS Startup

Remote, Work from home, Anywhere

Responsibilities

- Setting vision for customizing and extending the initial applications to start and build momentum
- Building success with initial apps for external customers: early feedback and fine tuning of technical approach based on real-world-observations.
- Ensuring that SaaS solution meet the company's short and long-term needs
- Maintaining a business consumer-focused outlook when aiding in the scale of startup delivery to market.
- Managing a remote team
- Representing the company at various fundraising and public events
- Staying on top of technology trends and developments.

Experience

- Extensive business experience, preferably at the C-Level in a startup environment
- Experience scaling organizations
- Enterprise technology and SaaS experience
- Excellent conflict resolution skills, understands people and their motivations, and the ability to articulate and work through differences that may arise
- Ability to manage projects/people and drive them to create positive outcomes

Compensation & Benefits

- The pay is equity in the company (part ownership).
- Once you help raise their initial round, the compensation package will include base salary plus equity
- A large part of this position's duties is to help raise capital; you will have a say in what your compensation will look like based on fundraising
- You will also have the chance to build a culture of success and diversity where everyone, and every idea, is welcomed
- Equity on a vesting schedule and salary upon successful raise of capital.
- The opportunity will be part-time before venture capital.

Company Profile

The company is an early-stage SaaS startup, currently in stealth mode, focused on making it easier for SMB to assess business and employee performance in HR & Operations. Fully Automated Process of Strategic & Tactical Action Strategies for Immediate, Current and Future Implementation.
